DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Germany on 17 March 2004. It is noted, however, that applicant has not filed a certified copy of the German application as required by 35 U.S.C. 119(b).

Claim Objections

2. Claim 1 objected to because of the following informalities: In line 2 it is suggested to insert --the device-- prior to "comprising" in order to increase the clarity of the claims. In line 3 it is suggested to insert --cannula—prior to "holder" in order to maintain consistent terminology throughout the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Lines 1-3 recite "device...with a grip part, characterized by". It is unclear whether the "grip part" or the "device" is characterized by the limitations following "characterized

by". This lack of clarity renders the claim indefinite. For purposes of examination the claim has been interpreted as though the device is "characterized by..."

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by WO 92/20281 to Weibel ("Weibel").

Weibel teaches: a blood-collecting device for newborn babies and infants ("for newborn babies" has been interpreted as a statement of intended use of which the device of Weibel appears capable), comprising a cannula (6, 7) having a blood inlet (6) and outlet (7) and provided in a holder (1) with a grip part (74), characterized by a bow-shaped bridge element (75) connecting the grip part with the cannula holder (see Fig. 8) and forming a free space (space depicted in Fig. 8 between 74 and 1 in which 7 resides) for the outlet between the cannula holder and the grip part (see Fig. 8).
